The authors requested the replacement of **Fig. 1**. Morphology of MCF-7 cells after the treatment with the extract of *Ipomoea tuba* leaf: a) untreated MCF-7 cell lines, and b-g) treated with different concentrations (5, 10, 25, 50, 75 and 100 µg/mL respectively) of the leaf extract.

The change includes the replacement of images 1c-1g.

The corrected figure is the following:

**Fig. 1.** Morphology of MCF-7 cells after the treatment with the extract of *Ipomoea tuba* leaf: a) untreated MCF-7 cell lines, and b-g) treated with different concentrations (5, 10, 25, 50, 75 and 100 µg/mL respectively) of the leaf extract
